New York Stock Market.
New York, June 5.—Wall Street—Stocks were weak during the first hour, showing a decline of 1 1/2 to 2, but during the past thirty minutes prices generally have been recovered, and the quotations at 11 o'clock are not materially changed from opening prices. Pacific Mail has been exceptional, showing considerable strength throughout the hour, and advancing 1/4. Kansas & Texas broke on reports of a heavy decrease in earnings. This was semi-officially admitted, however. Stock sold as low as 1 1/2.

New York, June 5.—Noon—Stocks somewhat more active; prices weak during the past hour, led by St. Paul and Union Pacific; declines are, however, fractional. At noon the market is moderately active and heavy.

New York, June 5, 3 p. m.—Stocks dull and weak, declines in some cases amounting to over 1 per cent. With a loss of 2 in Lackawanna, against a gain of 1 in Union Pacific, the market in the last ten minutes there was a rally of 1/4 to 1/2, with 1/4 for Lackawanna. The market finally closed steady on the last rally.

New York, June 5.—Governments quiet, but strong, the final quotations showing a slight advance in most cases, but a decline of 1/2 percent in current stocks. The market, as compared with the last previous sales, were irregular, the market having been weak during the early part of the day, but recovering a portion of the loss in the last two hours. A steady drive, accompanied by some realizing, has been made against some of the leading active stocks, notably Lackawanna, Union Pacific and New York Central, resulting in a decline of the price of the first mentioned of nearly 2 per cent. The general list opened weak and dull, and without any important reactions during the day, slowly and steadily yielded on limited transactions until after 2 o'clock, when there was a more decided break in the more active stocks, which was checked only a few minutes before the close of the hour. In the final transactions there was a rally of 1/4 to 1/2 percent, with Lackawanna gaining 3/4, and the market finally closed barely steady at improved quotations.

The Missouri Pacific directors declared the usual quarterly dividend of 1 1/2 percent, payable on July 1st.

Oregon Transcontinental shows a gain of 1/4 and Manitoba 1/2 percent. It is stated that the City of Yon, of the Pacific Mail, earned \$119,000 net on its last trip, the largest ever realized on one voyage by any of the company's steamers.

The total sales were 169,000 shares, an increase of about 39,000 shares over yesterday, the largest business being done in Union Pacific, St. Paul, Lackawanna, Northwestern, New York Central and Pacific Mail. In the order of sales, the sales being from 34,000 down to 15,000 shares each. In no other case did the transactions amount to as much as 7,000 shares.

AURICULAR.

The Facial Appendages Which Tell of Character.

A very popular writer makes the broad assertion that the hair and the ears are true indices of the character and intelligence of their possessors. Good, desirable hair, indicating broadness and stability of character as well as profundity and acuteness of intelligence, may be bought; consequently one rather inclines to dubiousness on the flowing locks' question. But upon the ear test of this new doctrine, one feels like joining hands with the writer, and whispering to him: "Thou hast touched the spot." The author of the theory says a man with broad, oyster-shell ears, having the usual number of wrinkles, may be safely classed as an individual of rare intellect and established character. The number is small and going out of fashion. Never seek to be familiar with the man who has fat ears. A man with such ears needs practical sympathy. The chances are he will tell you so. When you see a man with little shriveled ears, which have the appearance of having been glued upon the sides of his head, do not introduce ladies to him as a desirable man for marriage; expect he is a millionaire. A long ear plainly indicates a character. This is particularly characteristic of Chicago. The longer the ear the greater the firmness. Well developed ears, neither too long nor too thick, with no tendency to flop, and having a shrimp pink color, indicate a docile creature. There are some drawbacks to this art of reading a man's character by his ears. For instance, the high collars worn by our most popular men have a tendency to conceal the ear, but beneath will be found the indication of obstinacy and vanity, without common sense, though much eloquence, etc.
